

FCC

Just too let you all know I really benefit from the XM-Radio instant weather report.

I have a career in being a truck driver and i travel all over the country and by using instant weather I can get the latest update on the area or areas that I will be going too and if weather is bad I can take another route that has safer and better roads.

Too you it probably don't make since ,since you're always in one place and not at different places throughout the week.

Leave XM-Radio alone.They're doing a real great job and it's the only service that I rely on for weather reports.

What part of this stuff don't you understand?XM-Radio is following by all the guide lines and the way I see it ,you are just jealous.Wouldn't you like to have these option if you had to travel?Instant weather and traffic is the best..

Leave us all alone...And I am opposing HR 4026...
